

DATA SHEET

# Continuously build and prove your Cyber Workforce Resilience

## How do you know your organization will be resilient in the face of ever-increasing and more sophisticated cyber attacks?

All the latest tools and technology are not enough to ensure resilience; people and teams must have the right capabilities and make the right decisions when it counts. We are pioneering an entirely new approach to people-centric cybersecurity that enables organizations to assess, build, and prove their ability to effectively prepare for, and respond to, the latest cyber threats.

In a world where risks evolve at lightning speed, true resilience requires people and teams to learn continuously and work together seamlessly. At the same time, legacy check-box training and paper certifications aren't up to the task. Trusted by world's largest organizations and governments, our immersive exercises and labs improve the cybersecurity capabilities of the entire workforce, facilitating a fundamental shift in how organizations prove team performance and reduce risk, from the store room to the board room.

### For Individuals

Hands-On Labs offering engaging, gamified learning environments

- Defensive Cybersecurity Professionals
- Penetration Testers
- Developers
- Application Security Experts
- Cloud & Infrastructure Security
- Entire Workforce

### For Teams

Team-based simulations from the store room to the board room

- Executive Teams
- Crisis Management & Incident Response Teams
- Offensive, Defensive & SOC Teams

### For the Organization

Skills development exercises that drive transformative behavioral change

- Senior Leaders
- Front-line Employees
- High-risk Targets of Cyber Attacks

Trusted by the world's largest companies, governments, and defense organizations

The Value We Bring	
Benefits	Value
1 <b>Continuously prove cyber capability</b> across the organization, aligned to security frameworks	Benchmark and prove readiness to your Board, auditors, and insurers
2 <b>Improve organizational response</b> to business risks and emerging threats	Reduced breach costs and incident time; Industry and corporate risk compliance
3 <b>Increase efficacy</b> in recruitment, retention, and career development	Reduced recruiting costs and turnover
4 <b>Reduce cloud and application vulnerabilities</b> early and across the SDLC	Reduced developer remediation time/cost
5 <b>Reduce cybersecurity costs</b> and improve investment decisions	Save money and inform investment

## Why Immersive Labs

- **Immersive Realism.** Unparalleled content that offers world-class breadth and depth, along with speed of Cyber Threat Intelligence.
- **Proof of Resilience.** The data that enables CISOs to be confident that they have a cyber-resilient workforce.
- **Complete Organizational Coverage.** Measurable resilience for everyone in the organization, from store room to board room.
- **A Unified Enterprise Platform.** A unified enterprise platform that provides unsurpassed scale, security, and data-driven insights.

**Cybersecurity skills development, from the store room to the board room**

### Certification & Compliance

### Trusted by the world's largest organizations

Over **400** customers

**>3.5M** total labs completed

**>100,000** unique users

**>1,800** hands-on challenges
